Claire Yuqing Yang

201-705-9888 | yy5550@nyu.edu

EDUCATION

New York University Sept. 2024 - May. 2026

Master of Science in Applied Statistics for Social Science Research

GPA: 3.84/4.0

Core Courses: Causal Inference, Computer Vision, Multilevel Modeling, Messy Data and Machine Learning, Missing Data, Statistical Computing, Frequentist Inference, Modern Approaches in Measurement, Generative AI for the Social Sciences, Database and Data Science Practicum, Experimental and Quasi-Experimental Design

Chinese University of Hong Kong, Shenzhen Sept. 2019 - May. 2024

Bachelor of Business Administration in Management with Upper Second Class (Honors), Minor in Psychology

Honors: 2022-23 Dean's List, 2023-24 Dean's List, Four-Year Entrance Scholarship

Selected Courses: Basic Microeconomics, Basic Macroeconomics, Introductory Econometrics; Organizational Behavior, Organization Theory, Decision Making; Quantitative Methods (I) and Experimental Design, Quantitative Methods (II), Programming; General Psychology, Social Psychology, Consumer Behavior, Organizational Psychology

RESEARCH INTERESTS

Topics: Consumer and organizational decision-making, misinformation, and the use of AI to model, predict, and compare human judgment and behavior

Methodology: Causal inference for behavioral and large scale data, computational social science (NLP-based measurement, behavioral trace data), survey and experimental design

RESEARCH EXPERIENCE

Columbia Business School, Br-Ane Lab Jun. 2025 - Aug. 2026

Dev Lead (formerly Summer Research Intern) | PI: Prof. Kristen Lane & Melanie Brucks *New York*

Accuracy+: Rethinking Accuracy Nudges for a Multi-Goal Social Media Environment

- Designed and built a browser-based experimental platform to causally manipulate and measure exposure to misinformation in real time across social media environments (Bluesky and X), with behavioral trace logging.
- Co-developed the conceptual framework, pilot study, and preregistered analysis plan for a JPPM submission (Revise & Resubmit).
- Implemented experimental infrastructure in Qualtrics (HTML/CSS/JavaScript), enabling browsing goal manipulation and high-resolution interaction logging (JSON clickstream, timestamps).
- Estimated mixed-effects and causal inference models, including cross-classified random effects, and difference-in-differences designs.

Digital Twins and LLM-Based Behavioral Modeling

- Analyzed human and LLM-generated digital twin datasets from consumer-behavior experiments using mixed-effects models.
- Compared human and digital twin treatment effects across willingness to pay, product perceptions, and misinformation-sharing outcomes, and synthesized key patterns of alignment and divergence.

Consumer Perceptions of AI-Generated Image Authenticity Oct. 2026 - Present

Research Project with Ashlee Humphreys and Erik Steiner

- Review and synthesize literature on image authenticity and AI-generated content, comparing conceptual definitions and measurement

approaches.

- Contribute to research-question development on how consumers form authenticity judgments about AI-generated materials.

Authenticity and Engagement in Interactive Narratives Jun. 2026 - Present
Research Assistant | Supervisor: Prof. Rongrong Zhang, Chang Lu, Wanxin Wang

- Constructed a large-scale dataset combining player reviews collected from online LARP review platforms, narrative scripts, and recorded gameplay videos.
- Developed OCR- and LLM-assisted pipelines to digitize, structure, and analyze over 100,000 pages of narrative scripts and gameplay materials.
- Integrated multimodal data sources for qualitative and computational analysis of engagement and authenticity in immersive role-playing experiences.

AIM-Lab, Stanford Graduate School of Business Oct. 2026 - Present
Research Assistant (Trial Period) | PI: Yu Ding

- Collect and organize AI-generated product recommendations across four LLM platforms using a standardized prompting protocol.

Live Action Role Play (LARP) Game and Organization Theory Nov. 2022 - Apr. 2024
Research Assistant | Supervisor: Prof. Rongrong Zhang

- Drew on 40,000+ words of my field notes and scripts to analyze how interactive narratives create *authenticity* and collective meaning.
- Contributed to a qualitative study showing how players construct immersive belief and social bonds through co-created narratives.
- Conducted a follow-up experimental project applying LARP to diversity training, examining how the similarity between trainees' identities and the roles they play leads to positive training outcomes such as perspective-taking, and increased psychological safety.

Organizational Dynamics Lab Mar. 2024 - Aug. 2024
Research Assistant | PI: Prof. Xinyue Pan

- Replicated agent-based evolutionary game models in Python/R; analyzed Q-learning models of cooperation and social norm change.

Consumer Behavior Research Jul. 2023 - Mar. 2024
Research Assistant | Supervisor: Prof. Yohoon Jin

- Designed, conducted, and analyzed two pilot studies on luxury consumption and customer tolerance using Qualtrics and SPSS.

RELATED PROJECTS

Topic Modeling in Conversational Data: A Comparison of LDA and LLM-based Approaches Jan. 2025 - May. 2025

- Built an organizational conversation corpus via APIs and compared LDA and LLM-based models using semantic coherence.

Exploring Inflated Self-Reporting in Social Surveys Oct. 2024 - Dec. 2024

- Applied GBM propensity-score weighting to GSS data (N = 13,932) to assess the sensitivity of 23 occupational-disparity estimates to potentially invalid responses.

TEACHING EXPERIENCE

Basic Statistics I Feb. 2025 - May. 2026
Teaching Assistant | Undergraduate Statistics Course, New York University | Three semesters

INDUSTRY & ENTREPRENEURIAL EXPERIENCE

Shanhai Yi Culture Media Co., Ltd. (LARP Game) Sept. 2021 - Jun. 2022
Founder *Shenzhen, China*

- Founded and operated a LARP script–publishing studio, seizing market opportunity of LARP Game in 2021's China.
- Co-authored and managed the release of five scripts across modern, war, and sci-fi. Two scripts were published and sold nationally.

Versee Technology Co., Ltd. (VR Game), Product Consultant Apr. 2022 - Sept. 2022

Visagio London (Management Consulting), Project Assistant May. 2021 - Aug. 2021

McKinsey Shanghai, Project Assistant Mar. 2021 - Apr. 2021

SKILLS

- **Computational Research:** R, Python, SQL; Stata; experimental design (Qualtrics, JavaScript/HTML/CSS); behavioral data collection and logging
- **Causal & Statistical Methods:** causal inference, mixed-effects models, multilevel modeling, hypothesis testing
- **Machine Learning & NLP:** Computer Vision; LLM-based methods (prompt engineering, behavioral simulation); multimodal data (image, audio, and text)
- **Languages:** English (IELTS 7.5), Mandarin (Native)
